LA Series - Electric Linear Actuators

Rotork Process Controls designs and manufactures high quality, durable actuators designed for trouble-free performance under the most demanding conditions. The LA-2000 Series, with its field-proven design, is a perfect fit for all of your critical linear actuator applications.

The LA-2000 Series are self-contained, bi-directional, linear actuators internally geared to produce up to 1,600 lbf. (7,117 N) of thrust. Some models also offer continuous modulating duty up to 2,000 starts per hour.

A variety of speeds, thrusts, motors, voltages and control options are available which make the LA-2000 Series ideally suited for reliable positioning of dampers, combustion controls, gates, diverters, hydraulic variable speed drives, or other linear positioning applications.

LA-2000 Series actuators are also available with an internal or external amplifier. These amplifiers are all full-featured AC or DC switching devices designed to work seamlessly with the actuator for closed loop control.

Features
- Mechanical Thrust Overload Protection
- High Modulating Duty
- Highly Accurate Control
- Many Voltage Options
- Minimal Maintenance
- Cast Aluminum Housing
- Grease Lubricated
- Rain Shield & Bellows Cover

Benefits
- Protects Unit from Costly Motor Burnout
- Improves Process Control
- Better Control of Flow or Process
- Optimizes Wiring Costs
- Minimizes Downtime
- Lightweight & Anti-corrosive
- Any Position Mounting
- Prevents Damage Due to Water Intrusion

Redefining Flow Control
Popular Options:
- Thrusts from 150 to 1,500 lbf. (667 to 6,672 N)
- Stroke distance from 6” to 24” (152 to 610 mm)
- Modulating Duty: 2,000 starts per hour
- Manual override standard
- HART available
- Automatic thrust limiting
- Anti-condensation heater and thermostat
- Self-locking drive system to hold in last position and prevent backdriving up to thrust rating
- AC input power (single and three-phase) or DC input power versions
- Temperature range from -40 to 150 °F (-40 to 65 °C)
- Two year warranty

Applications:
- Slide Gate Control
  - Blending
  - Open / Close
- Diverter Operation
- Weigh Hopper Gates
- Flop Gates
- Clam Shell Gates
- Air Damper Control
- Burner Shroud Positioning
- Burner Tilt
- Igniter Retract
- Hydraulic Cylinder Replacement
- Pneumatic Cylinder Replacement
- Valve Automation
